

# MLOps in a Bayesian workflow

## Tracking experiments with MLFlow

Max Joseph, PhD  
Data Scientist, NCX Basemap Team

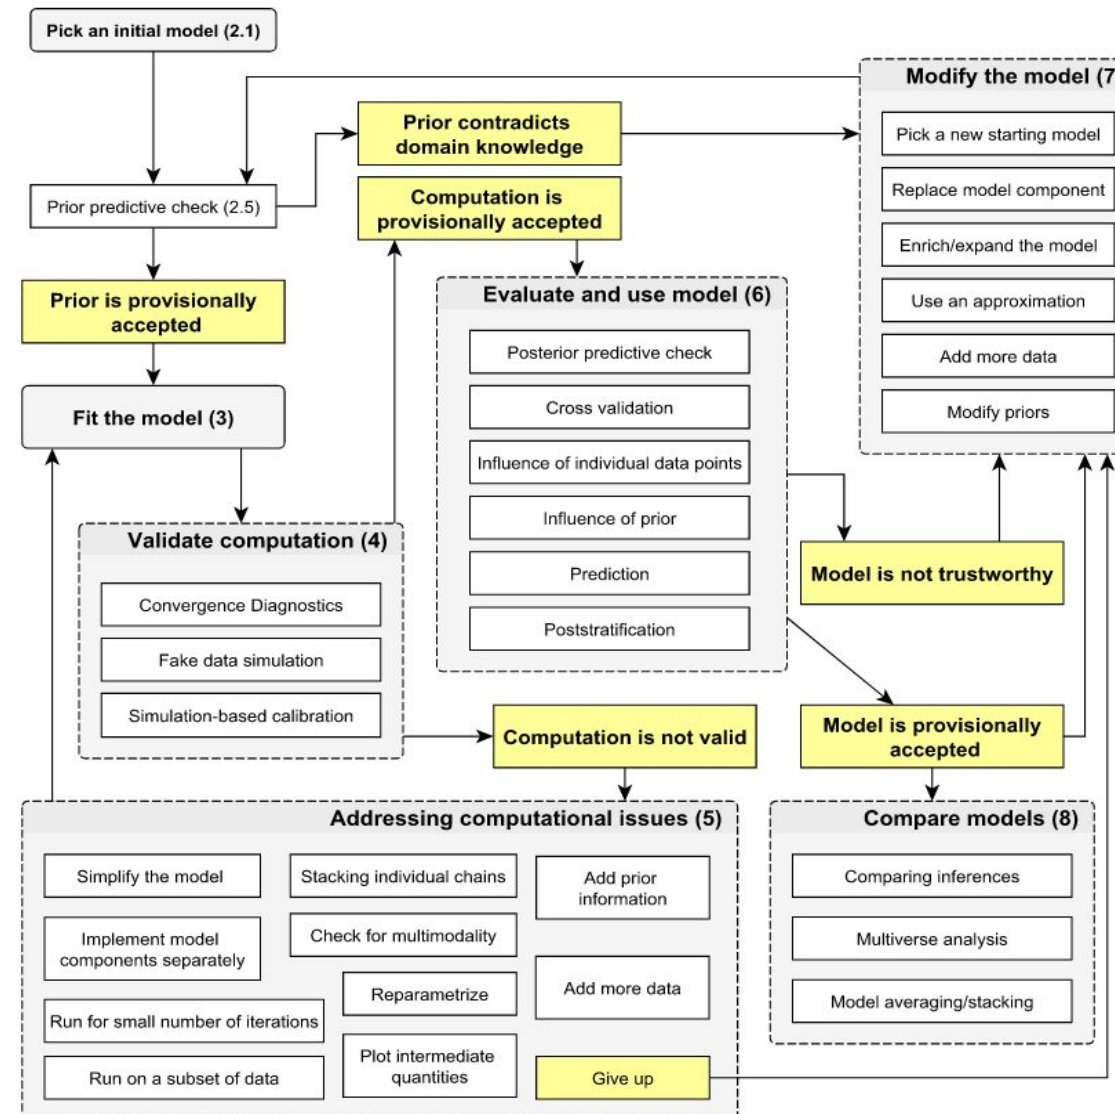

# NCX is Built On Basemap

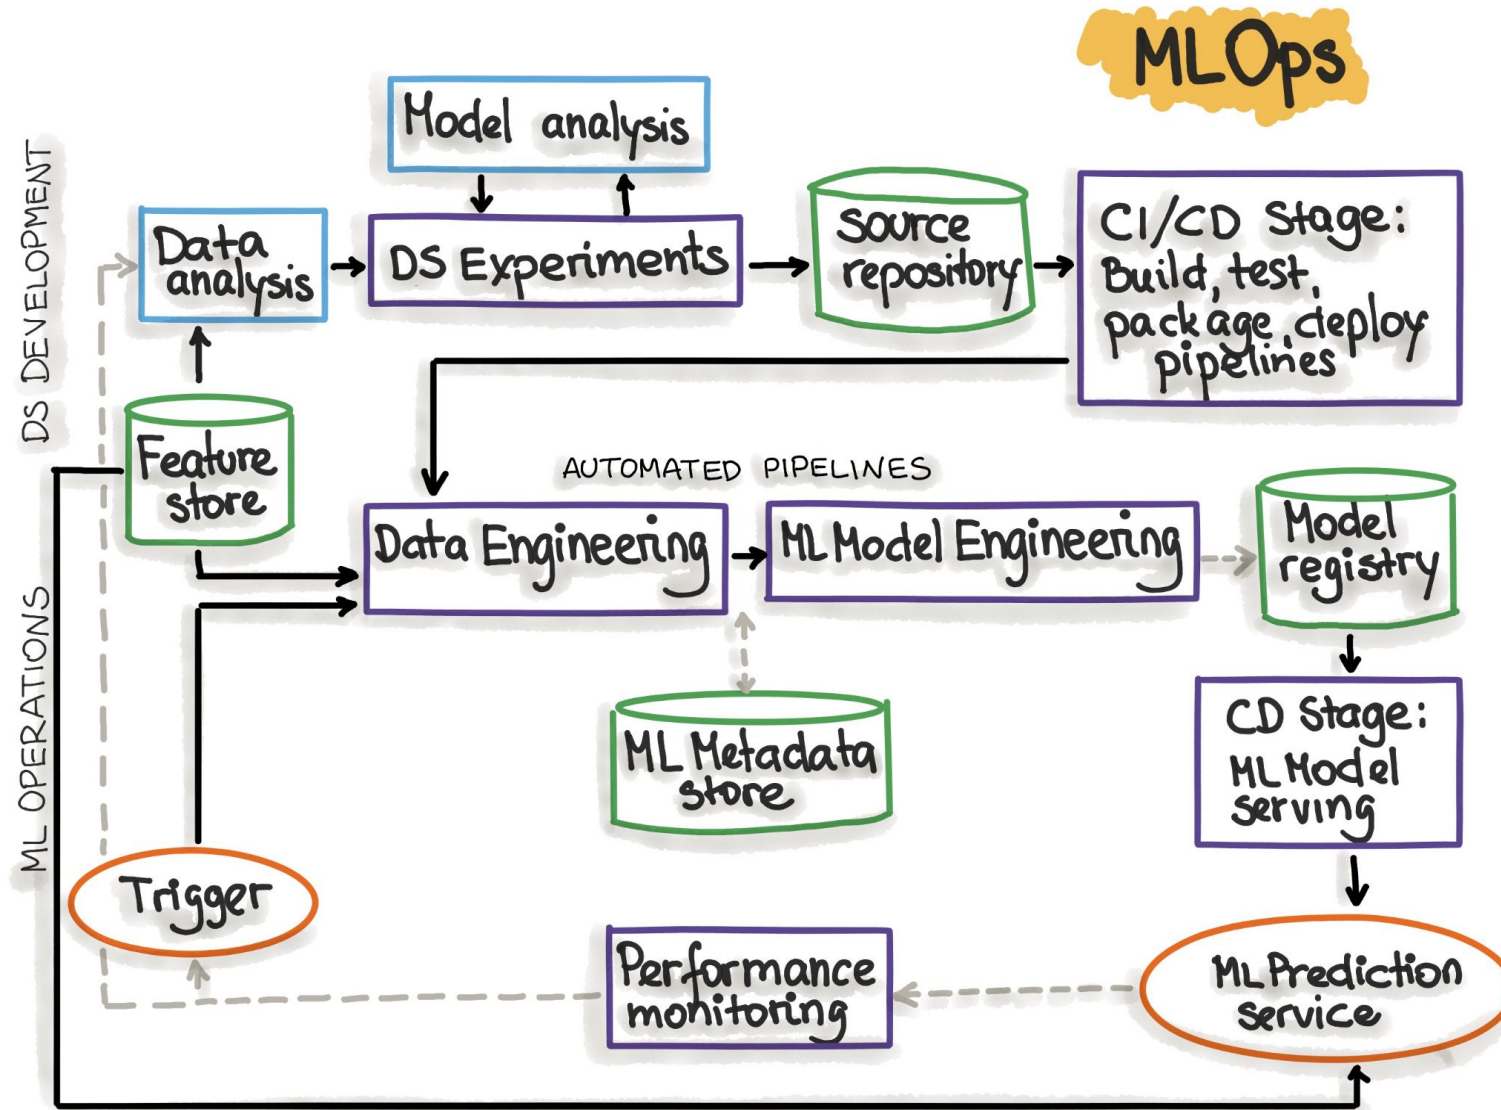

Basemap is a high-resolution  
Bayesian map of forest carbon in  
America.

1. Overview MLOps & Bayesian workflow
2. Tracking experiments with MLFlow
3. Demo

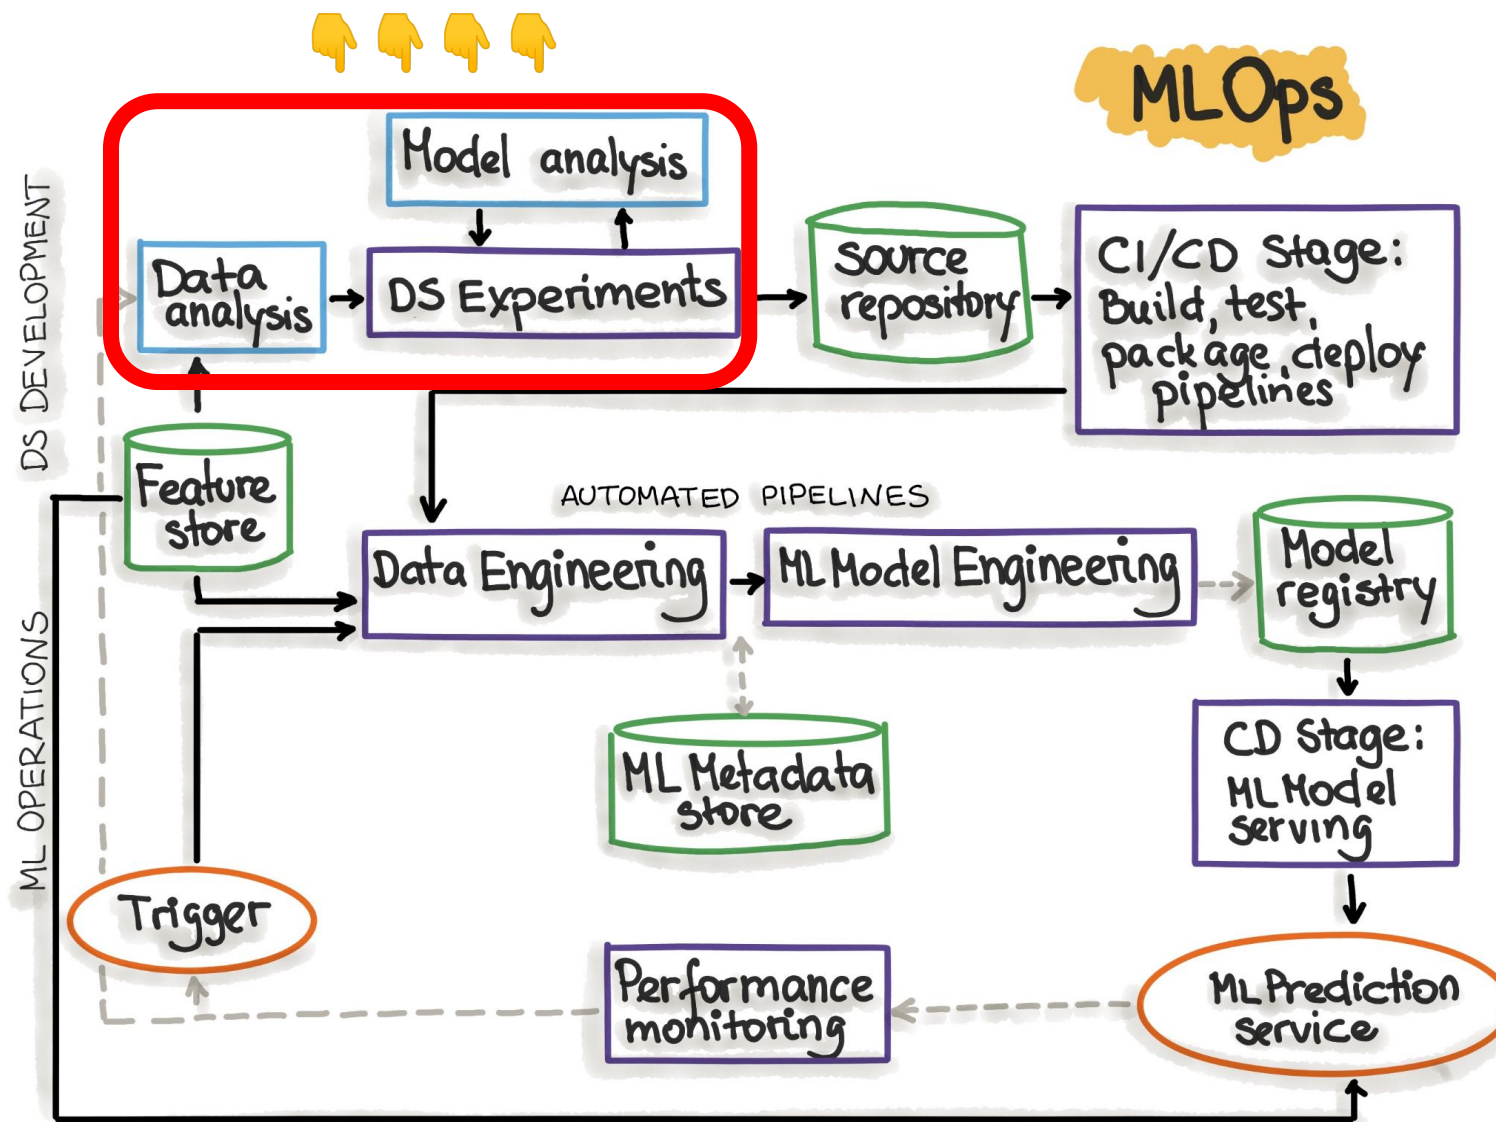

From the excellent [ml-ops.org](https://ml-ops.org)

<https://ml-ops.org/content/mlops-principles>

“Hell”, Hieronymus Bosch

Name	Size	Modified	Star
experiment1	0 items	09:03	☆
experiment2	0 items	09:03	☆
experiment3	0 items	09:03	☆

Start run

End run

**Log metadata**

“What’s the experiment”

**MCMC sampling**

Use Stan

**Log metrics**

Log elpd, run time, Pareto k, LOO, Rhat, etc.

**Log artifacts**

Log model object, predictive checks, performance diagnostics, .stan file
